

BE PART OF FLIGHTSIMULATION AT A NEW LEVEL

AXIS Flight Training Systems develops and produces civil flight simulators at the highest technical level. Through our technical know-how, we enable unprecedented realistic simulation for pilot education and training.

Aviation Engineer m/f/d Full-time, to start immediately

We are looking for an experienced Aviation Engineering employee who is interested in aviation and aviation training.

Your tasks:

- Design and development of aerodynamic models with Matlab
- Design and development of control loading systems with Matlab/Simulink
- Design and development of aircraft systems with Matlab/Simulink
- Development and implementation of acceptance tests with our clients
- Development and implementation of objective acceptance tests
- Carrying out approvals by the aviation authorities
- Business trips to our international clients

We are looking for the following qualifications and skills:

- Completed education in the field of aeronautical engineering (from a technical college/university of applied sciences)
- Independent, conscientious and organised way of working
- High ability to work in a team, flexibility, willingness to take responsibility
- Good command of English
- Great interest in aviation and aviation training

Your profile:

- Experience in a comparable field
- Experience with Linux systems
- Experience in working with aerodynamic models
- Experience with Matlab/Simulink

We offer:

- A highly motivated team in which your commitment is appreciated
- Flexible flexitime model and home office option
- Good public transport connections
- Coffee, tea and seasonal fruit
- Team events and further training opportunities
- The opportunity to put your product developments into operation on site with our national and international customers

Does this appeal to you? Then send us your application in English to: career@axis-simulation.com
