BE PART OF FLIGHTSIMULATION AT A NEW LEVEL

—

AXIS Flight Training Systems develops and produces civil flight simulators at the highest technical level. Through our technical know-how, we enable unprecedented realistic simulation for pilot education and training.

Software Developer m/f/d
Full-time/part-time, to start immediately

—

We are expanding our team in the area of agile software development under Linux and are urgently looking for a new employee to improve and further develop our broad code base.

Your tasks:
- Programming and expansion of the simulation platform
- Integration of avionics systems via our C++ frameworks
- Simulation of avionics systems in C++ / OpenGL
- Development of user interfaces (Java, HTML5)
- Further development of existing microcontroller software
- Active participation in the further development and implementation of new technologies
- Modelling the soundscape in the cockpit with Pure Data

Your profile:
- Passion for software
- Interest in the further development of our code base
- Enthusiasm for new technologies
- Interest in aviation and aviation training

We offer:
- A highly motivated team in which your commitment is appreciated
- Flexible flexitime model and home office option
- Good public transport connections
- Coffee, tea and seasonal fruit
- Team events and further training opportunities
- The opportunity to put your product developments into operation on site with our national and international customers

Does this appeal to you? Then send us your application in English to: **career@axis-simulation.com**
